

Drawing

BITUS' CENTREPIECE,

ma silver. Leaf shaped forms in  
spiral pattern. Fold-formed,  
soldered, and soldered.

Theresa Nguyen, London  
19.5cm · width 26.5cm · diameter

s design for an open and fluid  
is inspired by the energy of  
natural growth and nature's response  
to the sun. The design refers to  
multiple leaves unfurling from a  
tightly packed centre. The flowing  
mass of the blades of leaves evokes  
a feeling of being energised and  
warmed by the warmth of the sun.  
purchased following its inclusion  
in the Goldsmiths' Company's  
successful exhibition, 2011.
